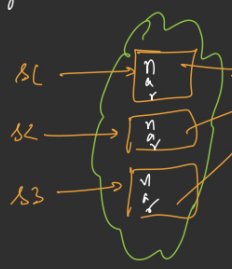
Static Final

```
Class Student {
    String name;
    int age;
    int rollNo;
    static String College;
}
```

```
Student s1 = new Student();
s1.name = "Aditya";
s1.College = "IITG";
Student.College = "IITG";
```



Class Variable

Class Name. variable = Value;

As Not stored in Heap

College = "IITG"

```
Class Student {
    ___
    ___
    static void markAttendance() {

    }
}
```

```
Student s1 = new Student();
Student s2 = ,, ,, ();
s1.markAttendance();
s2.___();
Student.markAttendance();
```

Static
- variables ✓
- Methods ✓

Method → static

1. One static Method can only call other static Method.
2. Static method can only access static variables.
3. Does not have access to "this" Keyword.

static String College = "IITC"
